ALLBÄCK
ORGANIC LINSEED PAINTS
Made from cold pressed organic linseed oil
Allbäck Organic Linseed Products

Environmentally Friendly
Long Lasting * Cost Effective
100% Solvent Free

Allbäck linseed paint manufacturing, founded in 1980 by long time master painter and craftsman Hans Allbäck, with strong support from his wife Sonja Allbäck. Allbäck linseed paint has a few simple goals: to make paint a product that is safe to use, environmentally friendly, very long lasting and economical. Using old recipes and techniques of manufacturing linseed paint, Hans Allbäck has brought this almost forgotten trade alive again. Manufacturing in small batches under very strict control is a key to the quality. There are no solvents or other chemicals in this product what so ever. Difficulties in finding top quality ingredients for this safe paint resulted in Allbäck to manufacturer many of the ingredients in house from scratch. The Allbäck paint is a superior paint and will preserve wood way beyond what regular commercial paint can achieve. You never have to scrape and paint failure is basically impossible. This is a one pot paint. No primer is needed. The paint has an ability to penetrate deep into the wood making priming unnecessary. You clean your brushes and other tools with linseed oil soap. No chemicals are used in any step with the Allbäck paint system. Apply thin coats. To bring back the color after many years, simply apply Allbäcks organic boiled linseed oil or maintenance wax.

Organic Linseed Oil Products

Organic Linseed Oil Paint
Our linseed oil paint is made from boiled cold pressed and specially purified linseed oil. The paint is 100% free of any solvent and can be thinned out with boiled linseed oil. No solvent! No water! No Zink! The white paint contains titanium oxide and a small amount of chalk. The colored paint contains metal oxide and earth pigment. You can apply the Allbäck paint on any clean and dry surface exterior and interior; wood, metal, plastic and previous painted surfaces. On any interior surface, apply the Allbäck Shellac primer (100% chemical VOC free). For best result, remove old paint first with infrared heat (The Silent Paint Remover). A clean wood surface will allow the linseed-oil paint to adhere directly to the wood for best result. If the underlying material fails, so will the linseed-oil paint.

Organic Raw and Boiled Linseed Oil
The raw cold pressed linseed oil is refined into a variety of consumer products. Our linseed oil is carefully and meticulously purified in a special process to extract all impurities. This product is excellent for preserving wood. The boiled linseed oil is also used for thinning paint as well as maintaining the linseed oil painted surfaces.

Organic Linseed Oil Window Glazing/Putty
The linseed oil window glazing is made from cold pressed raw linseed oil and variety of chalk. It is produced in a vacuum process. The glazing can be used for windows but can also be used as spackle for un-even or various surfaces. You can use the Allbäck linseed oil paint directly on the window glazing without having to wait for it to dry. This is a great time savings. For long term storage keep at below freezing temperature.

Organic Linseed Oil Soap
Omega 3 Soap
The linseed oil soap is extracted from cold pressed raw linseed oil. This is a completely organic product without any additives. We suggest using the linseed oil soap for cleaning paint brushes and other painting tools. It is also excellent for general house hold cleaning.
Organic Linseed Oil Wax / Maintenance Wax

Linseed oil wax is manufactured of linseed oil and a small amount of bee’s wax. This wax is used as a protective coating for clear wood, stained wood and painted wood surfaces and floor finishes indoors as well as outdoors.

Organic Linus Wall Paint

Interior and fire safe

The Linus interior paint "By Allbäck" is a flat linseed oil paint exclusively for interior applications. This paint can be applied by rolling or brushing on any interior surfaces like wood, stucco, wall paper, paneling etc. This is a One Pot Paint as well. Use the Allbäck shellac primer on porous surfaces like drywall and plaster.

Organic Pigment Wax – Wood Stain

The wax is made from linseed oil, bees wax and natural pigments. The surface is very water-resistant and durable.

Why Allbäck Organic Linseed Oil Paint?

- The paint is completely free of any chemical solvent and is completely safe.
- One Pot Paint. No primer needed. Same paint for indoor as outdoor applications.
- The dry weight is 100% and the paint cover approximately 135-180 square feet per liter. This is about 510 – 680 square feet per gallon. Available in 30 colors.
- You can paint once a day and the paint is completely dry within 24 hours in room temperature and adequate ventilation.
- The Allbäck’s paint is documented by the Swedish Heritage board since 1982
- The linseed oil originates from locally grown flax seeds in Sweden.
- The paint is emission tested and approved by the authorities of Sweden and has been an approved product for over 26 years.
Organic Linus Interior Wall Paint
Fire safe and very durable

Our interior Linus paint is an excellent alternative to commonly used petroleum acrylic interior paint. It is very easy to apply with a brush or a roller. It is a fire safe paint and very durable. The Linus paint can be washed. Use an organic linseed soap for cleaning.

Our experience in restoration with ecologically safe material resulted in the development of this paint at the customer demand and general awareness how dangerous chemical paint is.

We set out to develop a paint that could be applied the same as any acrylic paint but with out any negative aspects. It had to have excellent durability and easy to clean. It can also be used to fill uneven surfaces. The environmental aspects are of course also very important. No chemicals. 100% sustainability.

Product Information

- The paint contains purified linseed oil, water, chalk, cellulose and earth pigment.
- Dryer manganese sickativ.
- The paint can be used for all types of interior surfaces: wood, painted surfaces, concrete, wallpaper, plaster and dry wall.
- You can touch-up easy.
- Daytime aprox. 24 hours.
- Coverage 90-100 square feet/qt. Add up to 30% water.
- Available in 12 colors.
- Available in 0.85 gallon/3 liter (selected colors).
How did this company get started?

After many years in the trade, Hans Allback found himself ill from all the solvents in paint. After extensive research, Hans and Sonja found that old methods and material lasted much longer than chemically produced paints. On top of this, it was NOT hazardous to work with. Now, the production combines old wisdom and modern technology. As a result of this we can offer you this amazing paint system for exterior and interior applications without all the detrimental effects usually combined with painting today. You can say that things have come full circle, old appears to be better than the best modern chemically produced paint. The elimination of hazardous material in the workplace and home is now possible.

Leonardo Da Vinci

Painted with pigmented Linseed Oil 500 years ago which remain 100% intact today. You can paint your whole house with amazing Allbäck Linseed Oil Paints.
